

MCU Update Process

1: Format a USB flash drive in FAT mode.
Copy over the XXX.bin file alone and at the root.
Insert the key into the "UPDATE" USB socket on the back of the device.

2: Enter the menu by making a long press on the volume button and choose "System Setting":

3: Choose "Upgrade":

4: Choose "MCU Upgrade":

5: Choisissez "Yes":

6: The update starts and ends in a few seconds.
The unit goes to stand-by mode.

7: Make a "factory reset" .
This function is available in the menu, in "System Setting".
