X-CD9 TUBES CD PLAYER

X-CD9 is a CD player featuring analog and digital outputs. But there is something special about the analog output : as can be seen from the front panel, 2 glowing miniature tubes provides a great musical sounding audio signal to your amplifier.

Great cares were taken to power this CD player by using a toroidal transformer. This provides ample and clean power for all analog and digital circuitry like CD mechanism, laser control and the all important Digital to Analog converter (DAC).

Equipped with Coaxial (RCA), Optical (TOSLINK) digital outputs, Un-balanced (RCA) and Balanced (XLR) analog outputs, the X-CD9 is the perfect CD player for your Hi-Fi system and the great CD collection you have.

X-CD9

TUBES CD PLAYER

SPECIFICATIONS

AC input	115V / 230V
Standby Consumption	Inf. to 0,5 W
Maximum Consumption	10 W
Transformer power	25 VA
Transformer Type	(1X) Toroidal
Digital Outputs	Coaxial (RCA - 75 Ohm)
	Optical (TOSLINK)
Analog Outputs (tubes)	RCA / XLR
Distortion (%)	Inf. 0,009 (RCA) / 0,005 (XLR)
SNR (dB)	106
Remote Control	Yes (IR)
Accessory	Power cord
Product Size (WxHxD in cm)	43x7,3x26
Packaging Size (WxHxD in cm)	51x14x34
Gross Weight (kg)	5,15
Net Weight (kg)	4,1
Model N°	X-CD9
Code EAN	3760179292398
